

ELECTRICAL INDUSTRIAL CART T250

Designation: internal transport in productions, commercial projects, hospitals, airports and e.t.c.. It is easy to pass through internal and lift doors.

TECHNICAL PARAMETERS

Over all dimensions - 2392/900/1185 mm

Loading capacity - 250 kg

Drive – an electric motor, a brake, connected to a back axle with a differential gear

Electrical supply - 24V/110 Ah

Energy reserves - 16 h at a ratio of movement : idle time = 1:3

Turn radius - 1.8 m

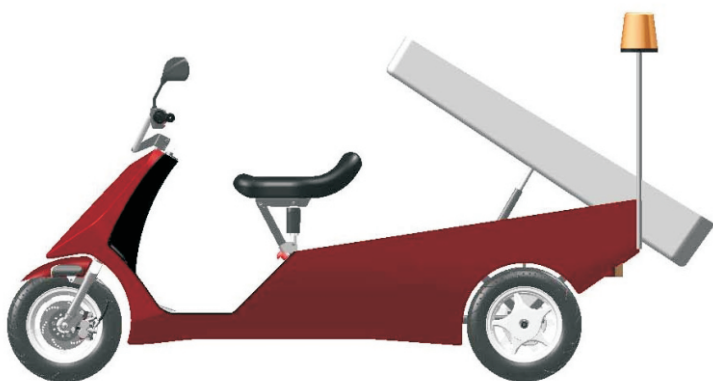

Maximal surmounted slope - 12 %

Brake system - doubled

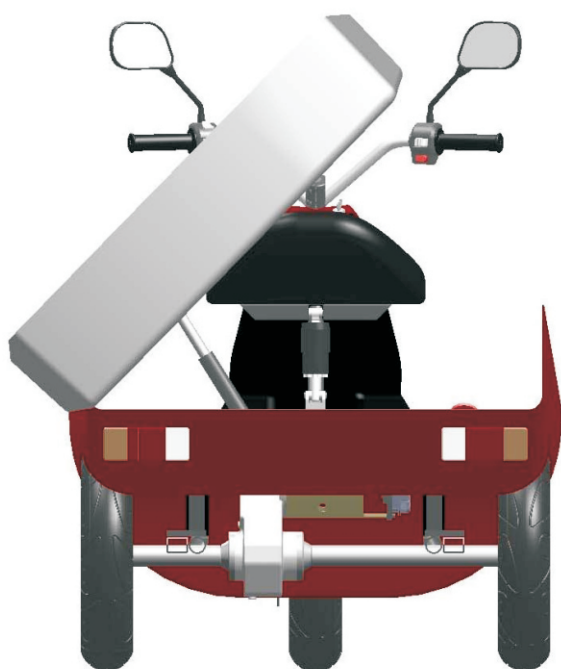

Signal system – light and sound

Weight without load - 210 kg

ADDITIONAL POSSIBILITIES

✓ Normal-dump electrical cart

✓ Side-dump electrical cart

✓ Electrical cart with additional structure for light loads

✓ Light-signaling
